### YAMAHA AEROX MBK NITRO '02~

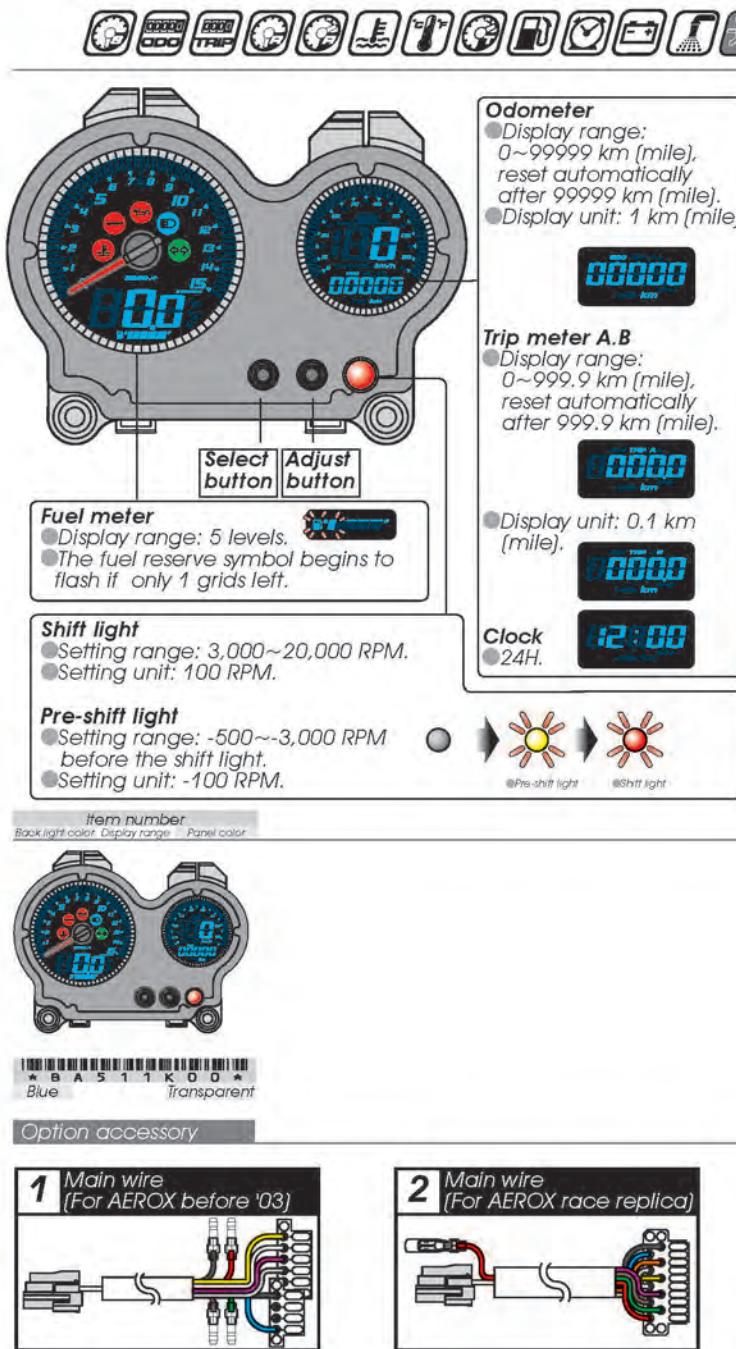

The new Aerox EVO meter comes with 8 colors changeable backlight, so you could change the backlight to fit your own Aerox more.

The LCD bar graphic speedometer comes with 3 different scales to fit in different models on the market.

The new bar graphic tachometer comes with 2 different RPM scales, so you could also adjust the tachometer range according to your demand. Besides that, the new Aerox meter comes with the digital Tachometer at the same time and you could use it to adjust the engine.

The new power test functions could help you know more about the performance of your engine after tuning up.

There are so many upgraded function for Aerox, so don't miss it!

● Speedometer	Display range: 0~199 km/h (0~124 MPH)
● Bar graph speedometer	Display range: 0~80 MPH / 80 / 160 km/h
● Odometer	Display range: 0~99999 km (mile), reset automatically after 99999 km (mile)
● Display unit: 1 km (mile)	
● Trip meter A.B	Display range: 0~999.9 km (mile), reset automatically after 999.9 km (mile)
● Speeding warning light	Setting range: 30~199 km/h (19~124 MPH)
● Top speed record (Max.)	Display range: 0~199 km/h (0~124 MPH)
● Tire circumference compensation	Setting range: 50~210 %
● Needle tachometer	Display range: 0~10,000 / 15,000 RPM
● Digital tachometer	Display range: 0~20,000 RPM
● Bar graph tachometer	Display range: 0~10,000 / 15,000 RPM
● Shift light	Setting range: 3,000~20,000 RPM
● Pre-shift light	Setting range: -500~-3,000 RPM before the shift light
● Max. RPM record (Max.)	Display range: 0~20,000 RPM
● The RPM input signal number setting	Setting range: 0.5, 1, 1.5, 2, 2.5, 3, 4, 5, 6
● The RPM input pulse	Setting range: HI [The positive wave pulse] Lo [The negative wave pulse]
● Thermometer	Display range: 0~150°C (32~302°F) <100°C(F)Display unit: 0.1°C (°F) >100°C(F)Display unit: 1°C (°F)
● Over temp warning light	Setting range: 60~150°C (140~302°F)
● Top temperature record (Max.)	Display range: 0~150°C (32~302°F)
● Fuel meter	Display range: 5 levels
● Insufficient fuel warning	Display unit: Each level represents 20 % The fuel reserve symbol begins to flash if Only 1 grids left
● Clock	24 H
● Volt meter	Display range: DC 8.0~18.0 V
● Backlight brightness adjust	Setting range: 1~5 (Darker)~5~5 (Brighter) Setting unit: adding 20 % each adjustment (5 segments)
● Back light color change	Setting range: red, orange, yellow, green, blue, light blue, purple, white
● Target speed timer	Setting range: 30~195 km/h (20~120 MPH) Setting unit: 5 km/h (MPH)
● Target distance timer	Setting range: 1/32~30/32 mile (50~1,500 M)
● Effective voltage	DC12V
● Effective temperature range	-10~+60°C
● Meter standard	JIS D 0203 S2
● Meter size (W X L X H)	169.4 X 131.2 X 89.8 mm
● Meter weight	Around 422 g
● Indicator light color	<ul style="list-style-type: none"> <li>● High beam-blue</li> <li>● Turn signal-green</li> <li>● Oil-red</li> <li>● Speeding-red</li> <li>● RPM shift light yellow / red</li> <li>● Temperature alarm-red</li> </ul>

### GILERA RUNNER

The all-new design speedometer for GILERA RUNNER. With the 80 mm big & illuminated needle and the tachometer up to 15,000 RPM , you could easily get the real time information right away.

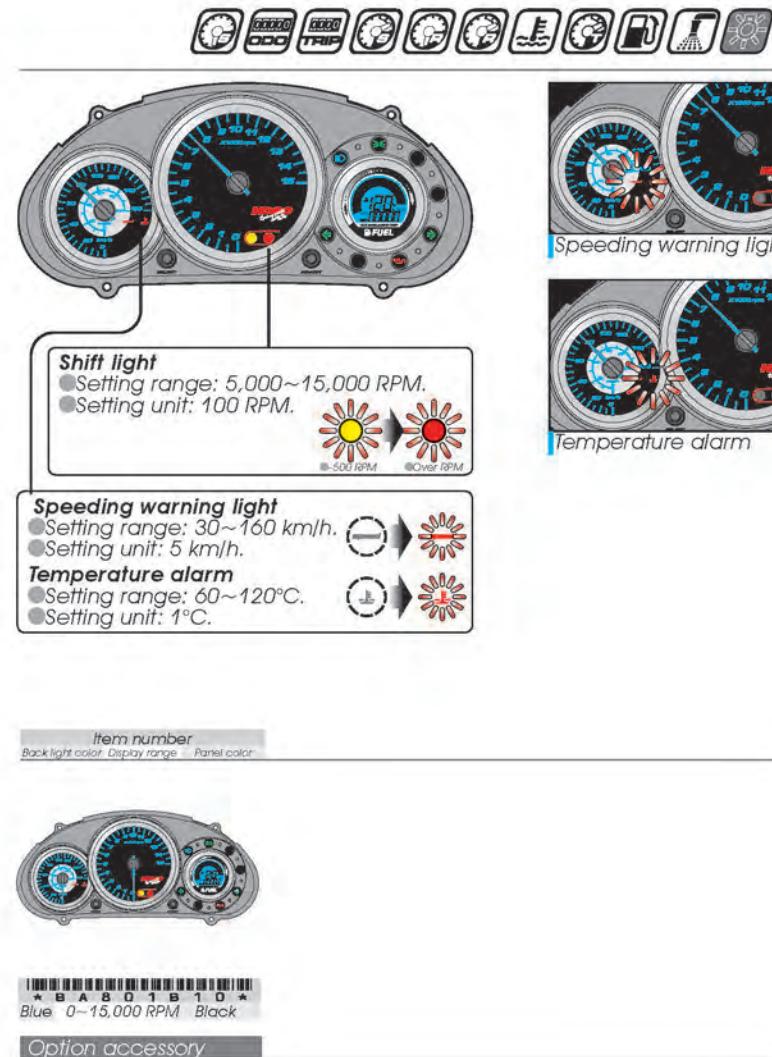

The MAX120°C temperature gauge could show you the accurate situation of your engine.

The MAX160 km/h speedometer gives you the chance to know your limit.

The speedometer designed for racing and unique.

06107

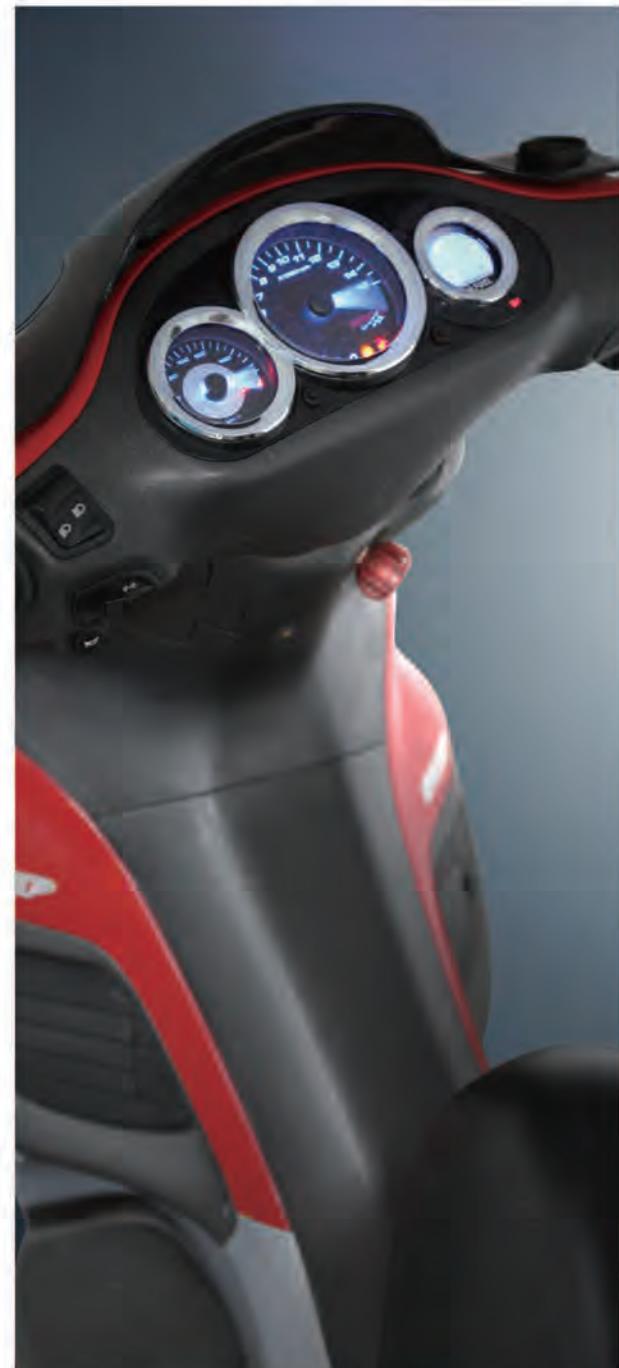

● Speedometer	Display range: 0~160 km/h (0~100 MPH) Display unit: 1 km/h (MPH)
○ Display internal	<0.5 second

**RX1N**

Just the right size & shape designed for ATV & Motorcycle. With the up to 15,000 RPM tachometer & the illuminated needle, you could read the information easily even in the night.

With the MAX power test, you could check the top speed your machine could reach and the time & distance you need to reach it.

The target distance test provides you the chance to see how fast you are and how much time you need to reach at a limited distance.

The target speed test provides you the information of how much distance you need to reach the speed you set and how long it takes.

It is just like you have a DYNO on your machine for you to adjust your machine. Are you ready to join the race?

**RX2N<sup>+</sup>**

With the unique light tachometer you could see the RPM much easier in the night.

The light point will show you the MAX RPM you reach all the time.

With the settable shift light function, you could make the setting according to your riding habit. The 0~10,000 RPM & 0~20,000 tachometer versions made for the sport bike which could reach over 18,000 RPM sometimes or cruiser & ATV which reaches around 8,000 RPM at most time.

Looking for a nice meter with the best RPM range? The RX2N is made for the bike paranoid, get the RX2N and then enjoy your riding with it!

**DB-01R**

Why KOSO never make a nice speedometer for the enduro?  
We heard from you, and that's why KOSO start to introduce the DB (Dirt bike) series meter from the end of 2007.

A very simple and small speedometer with bar tachometer designed for the Enduro with E-mark homologated!

Are you looking for a nice & tiny speedometer for your dirt bike?

Take the KOSO DB-01R and enjoy the dirt.

This is a new series designed for the dirt bike, and we will introduce you more DB series meter in the coming 2009.  
Let's wait to see what KOSO will bring you.

**DB-01R+**

The DB01R+ is an upgraded design for the DB01R with 2 more telltales for the new Fl bike. The meter comes with the bigger LCD display, so the information is easier to see during the riding. The new meter also comes with 2 different backlights, so you could adjust the backlight color according to your preference.

## DB-02 OFF-ROAD VERSION

The new DB-02 works with the inner battery. It is designed for the off-road bike without battery.

With the new dynamic design shape, the DB-02 could fit your off-road bike or ATV well.

With the changeable bar graphic tachometer function, you could adjust the bar graphic tachometer to fit different types engine as you need.

Except that, the new designed 3 stage shift light could make you to make the gear shift timing perfect.

Besides that, we add the digital tachometer function, so you could also switch the digital speedometer to digital tachometer when you want to use the meter on the race.

**3 stages RPM shift light**  
● Setting range: 5,000~20,000 RPM  
● Setting unit: 100 RPM

**Speedometer**  
● Display range: 0~360 km/h (0~225 MPH).  
● Display unit: km/h & MPH for alternative.

**Digital Tachometer**  
● Display range: 20,000 RPM.  
● Display unit: 10 RPM.

## DB-02R Race version

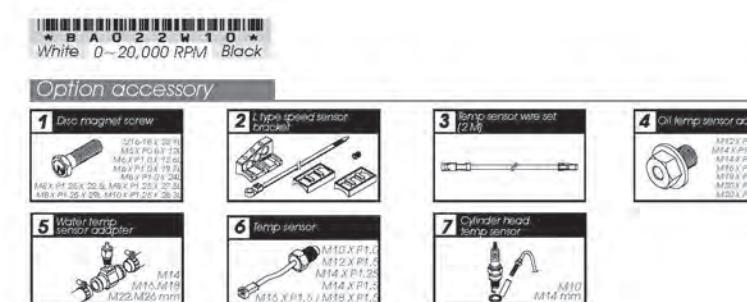

The new DB-02R is designed for the street bike with battery.

With the elegant white back light, the meter display will become very clear in the night time.

Same as the DB-02, the meter comes with the changeable graphic tachometer which could fit almost all kinds of engines on the market.

Except the function DB-02 has, the DB-02R comes with the power test function for you to test the performance of your bike.

The new added engine hour meter is designed for you to maintain the engine especially for the dirt bike or ATV.

## THE PLUG-IN INDICATOR KIT FOR DB-02 & DB-02R

The Indicator light kit is developed for the DB-02 & DB-02R meter for on-road use.

Unlike the Indicator light kit in the market, the new Indicator light kit comes with different telltale symbols, so you could assemble it according to your own demands.

There is no need to force yourself to fit some kit doesn't match your bike any more.

### Supply voltage **DC 12 V**

- Effective temperature range -10~+60°C
- Meter standard JIS D 0203 S2
- Meter size (W X L X H) 141.5 X 72.4 X 18.4 mm
- Meter weight Around 68.5g

**XR-S**

The speedometer with E-mark homologation is designed for the atvs, and fit on motorcycles and scooters. We will start to provide you the speedometer with km/h & MPH changeable function, and the new tire circumference adjust program from now on. With this new function, the meter will be much easy for you to use it. Without the indicator light, the meter is much smaller and easy for you to install it. For solving the installation problem, we also provide you 2 universal brackets for you to fix it on your atvs.

## XR-SRN

The new multifunction speedometer designed for the ATV. The tachometer provides you the information about your engine situation all the time. The 8 indicator light design could fit most of the ATV without any problem. A new and nice shape to make your ATV looks more special. If you have a original fuel gauge, we could display the fuel on the meter. If not, you could choose the clock and temperature for your personal demands. Just try to think about different way and make things fun.

OEM 2013

**ND-02**

The speedometer is designed for bigger engine scooter or moped. The ND-02 comes with a 72 mm needle meter and 72 mm LCD design which could offer the customer the moving feeling through the needle and more information on the LCD as the new generation trend is now.

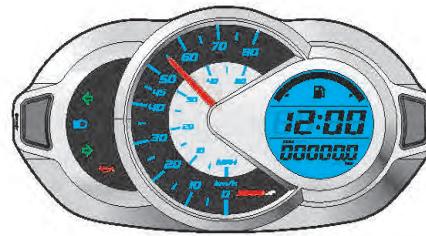

Except that, the meter comes with 5 telltales and could be adjusted according to the manufacturer's demand. All the functions could be re-designed and modified according to the customer's design.

ND-01 &amp; ND-02

**ND-03**

The ND-03 meter is the latest meter designed for the small and middle size sporty scooter. The meter comes with the needle driven by the stepper motor, the round shape LCD display, and 5 telltales. The meter function could be adjusted according to the demand of customers for purpose, so it will fit your own designed scooter easily.

NEW!

- Speedometer Display range: 0~80 km/h (0~50 MPH)  
Display unit: 10km/h (MPH)
- Refresh timing <0.5 second
- Odo Display range: 0~99999.9 km (mile)
- Trip A Display range: 0~999.9 km (mile)
- Trip B Display range: 0~999.9 km (mile)
- Clock 24H
- Fuel meter Display range: 10 grids  
(Each grid represents 10%)
- Insufficient fuel warning The fuel reserve symbol begins to flash if only 3 grids left

The speedometer comes with the tachometer function inside.  
The very simple shape design could fit on different style ATV very well.

The 8 telltales on the meter could be modified according to your special demands.

The LCD function could be changed according to your demands, too.

If you are interested in the meter, please contact us to get more information for it.

**DBR**

The DBR meter is designed for the enduro and comes with all the functions you need. The full LCD design comes with a digital speedometer which is easy for you to see when riding. The bar graphic tachometer creates the same movement feeling as the traditional needle driving tachometer. All the functions could be adjusted according to the customer's request.

**BB-SA**

The new speedometer is designed for big engine ATV, with 88 X 46 mm LCD on it. The nice shape could fit on the sport & utility ATV well. To match the demand of the new generation ATV, the meter comes with 10 telltales and could be adjusted to fit different demands. The meter is ready and could be modified according to the customer's requirement and demands.

**DB-01**

The DB-01 is designed for the sport ATV, motocross and off-road bike.

With a very tiny size and very sporty shape, the DB-01 could fit your new generation design ATV & bike very well. With 4 telltales could be adjusted according to different demand and requirement.

If you are interested in the new DB01, please feel free to contact us for the details.

Except that, the LCD and meter function also could be adjusted according to your demand.

**RX1NR**

Most of the tachometers designed for race is digital, and many racers really want to have a big tachometer works in needle for them to check the RPM easily during the race. Now KOSO bring you the new race RX1NR with the 64 mm needle tachometer driven by the stepper motor with real time respond, and a temperature meter for you to check the engine situation during the race. With the shift light and max record function, you could get all the information you need for race.

Get the new RX1NR to monitor your engine, and enjoy the race.

**RX2NR+**

If the RX1NR is still too small for you need, please try the RX2NR. With the 80 mm needle tachometer driven by the stepper motor with real time respond, and a temperature meter, it will be easier for you to check the engine situation during the race. With the settable shift light and max record function, you could get all the information you need for race.

Get the new RX2NR to monitor your engine, and enjoy the race.

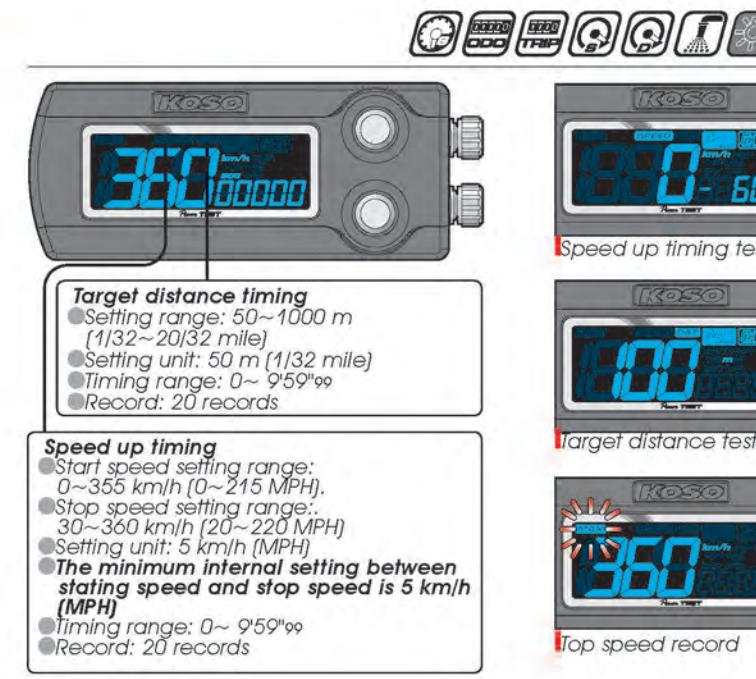

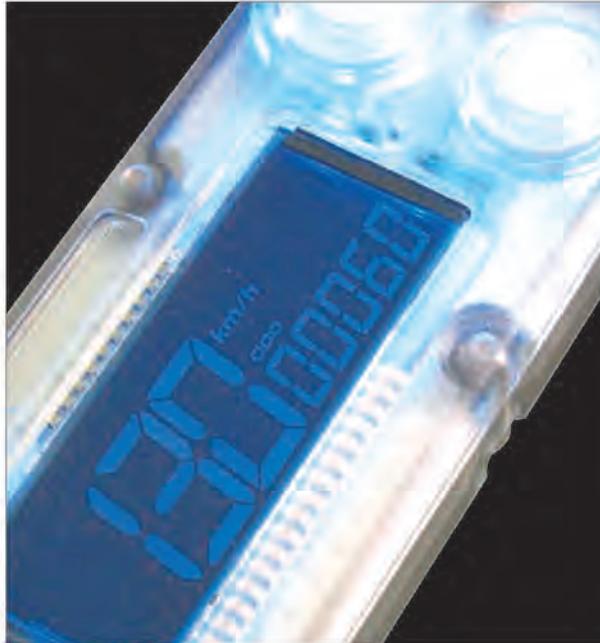

There are more and more racer practice in the night, so we heard the demand of backlight from the customers. For this reason, we make a upgraded on the RX2N to make the meter comes with the backlight. In this case, it will be easier for the customer to use the meter in the night.

Race 2013

## POWER TEST

The speedometer is designed just for racing. The POWER TEST functions could provide you all the information you need for scooter-tuning. The target distance test provides you the chance to practice for the drag race. All you need is set the distance as the race, and then practice & adjust your scooter to the best situation. The speed up test provides you the information about your speed up time. You could set it at different speed range to check how your scooter perform such as 0~100 km/h, 30~80 km/h. With the 20 records, you could adjust the scooter and test without stop. Don't tell us that you are ready for racing without our power test meter!!

## DUAL EGT

The EGT meter is the best tool for you to monitor your engine and the dual EGT meter is specially designed for the snowmobile or bikes with dual pipe system. Checking the gas directly from the engine could help you understand your engine situation and avoid the engine troubles.

Remember to get the KOSO Dual EGT meter for your snowmobile or bikes before tuning up.

**KOSO Dual EGT**

- 3 Meter bracket (for handle bar)

## EGT sensor

## INSTRUCTIONS

The temperature indicated on your gauge is the temperature at the tip of your exhaust sensor. This temperature is different for each sleds on the market. An engine should never be tune by exhaust temperature alone. The exhaust gas temperatures are a great tuning aid but they are not the final word. The normal temperature range for most sleds will range between 593°C and 676°C depending on the engine set up. The temperature indicated should always be correlated with the piston and plug color. Generally, probe location should be between 10 cm to 15 cm from the piston skirt out. Each sled and exhaust systems manufacturer have their own specifications for probe location and running temperature. To be more precise, these manufacturing companies should be contacted for all the details needed.

**EGT**

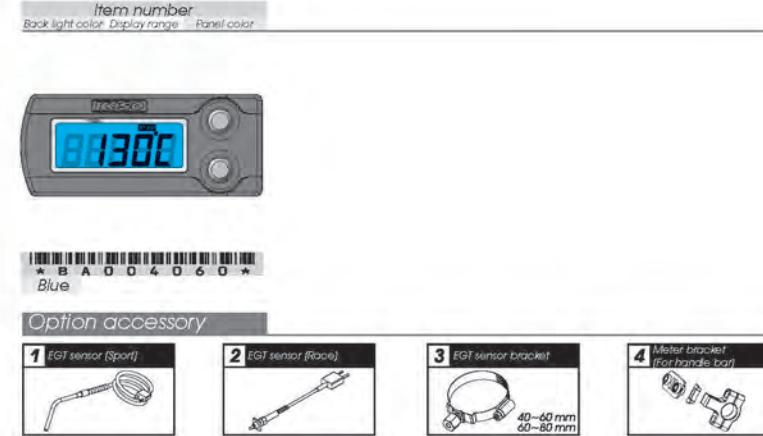

The EGT meter is the best tool for you to monitor your engine situation.

Checking the gas temperature directly from the engine, you could know the situation of your engine is the temperature too hot to damage your engine?

For 2 stroke engine, there is no air/fuel ratio meter for you to adjust the carburetor and you could also check the air/fuel ration by the exhaust gas temperature.

If the mix ratio is not good, the engine will become very hot, and you could see it right away from the EGT meter.

Remember to get the KOSO EGT meter before tuning your engine!

**X-1 Boost Gauge**

Today, many horsepower enthusiast are upgrading their engine with Turbo or Supercharger. For this reason, we came up with this basic boost gauge with warning and peak functions. Made to resist cold temperature, water or dust, this gauge can be adapted to any engines with turbo or supercharger. The changeable scale from 15 to 30 psi, the warning and peak recall function makes it a great tool.

- Boost Pressure digital display  
Display range: 0~30 PSI, will blink to warn at overrange.

**X-2 Boost Gauge**

This new multi-function unit is a great tool for all horsepower enthusiast that are upgrading their engine with Turbo or Supercharger. Following many requests, we came up with a unit that combines Boost, air fuel ratio and a temperature function who can be installed on the cooling system or the Intercooler. This gauge is made to resist cold temperature, water or dust. It can be easily adapt to any engines with turbo or supercharger. The X-2 instrument will give you precious information to help you pull out more horsepower out of the engine or save it from bad damages.

## Mini style

**G2 REV. COUNTER**

After 2 years development and research, we finished the all the rev. counter now.

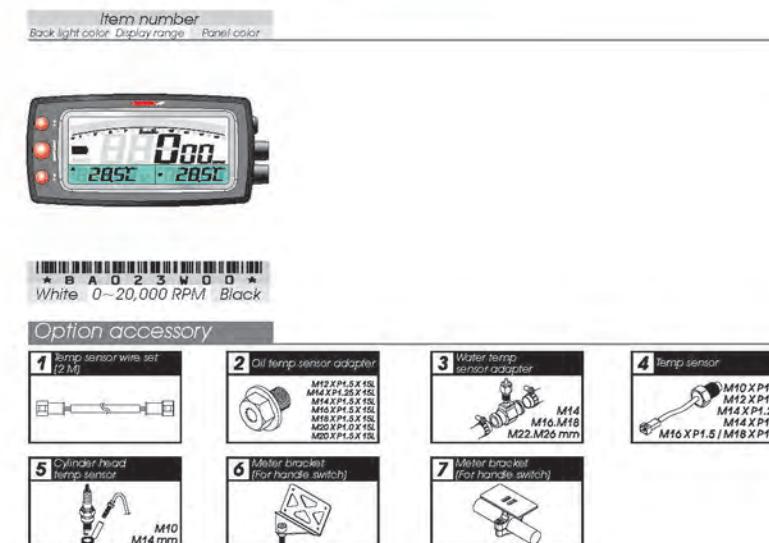

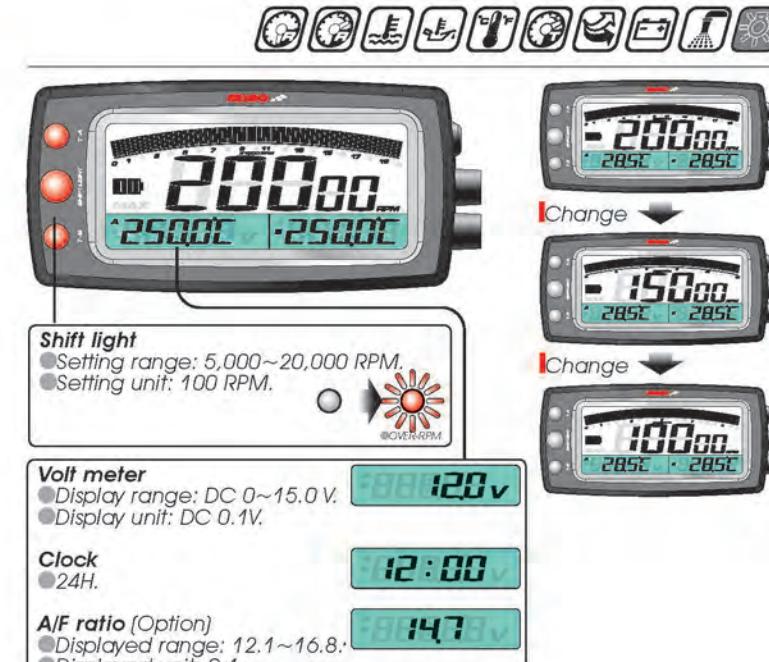

With the bigger LCD, the new rev. counter could show you the engine revolution both in bar and digital.

The all new rev counter bar design is adjustable, so you could adjust the rev. counter range according to your engine.

Except the rev. counter, the G2 comes with 2 temperature meter, volt meter, and the clock function, so you could get almost all the information you need from your engine.

Except that, you could also purchased the optional O2 sensor and connect it to the temperature wire to get the air/fuel ratio information.

After all, the new G2 meter comes with the shift light and 2 temperature alarm light for you to make the setting and monitor your engine. Get the new G2 rev. counter, and join the race.

**G1 REV. COUNTER  
(WITH BACK LIGHT)**

The small rev. counter is designed for the race, so we try to make it very small and work on the inner battery. There are tachometer, thermometer, the engine running hour, MAX record, and the RPM & temperature alarm functions including in the rev. counter, so you could get almost all the basic function you need for the race with it. If you want to use the meter on your bike every day, you could also connect the back light power to your battery and enable the back light function.

Race 2013

## THE WIDE BAND A/F RATIO

The meter is designed for using it on the 2 stroke race bike or the snowmobile for the customer to adjust the carburetor or the injection system.

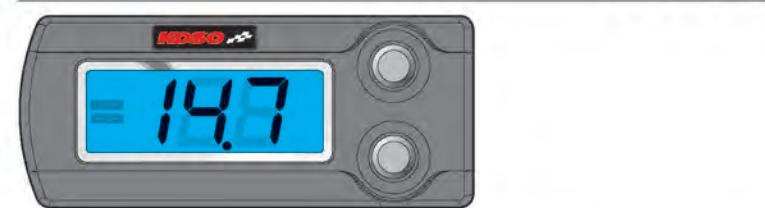

The BOSCH wide band sensor is the best wide band sensor used on all the race track and testing laboratory.

The air/fuel ratio meter could show you the real time information at the shortest time.

Except that, you could also make the setting to warn you when the air/fuel ratio is too lean or too rich.

0641065

- A/F ratio      Displayed range: 10.0~24.0  
Displayed unit : 0.1

## A/F RATIO

The air/fuel ratio meter is designed for the engine engineer or the motorcycle shop to adjust the carburetor or the fuel injection system when changing the engine parts.

The meter is power by the inner battery, so it is very convenient for you to use it as a tool.

If you want to monitor the air/fuel ratio all the time, you could also install the meter on your bike and connect the back light power to the battery on your bike to get the back light.

Race 2013

## Mini style

**THERMOMETER**

The new thermometer is designed for both race and the street use.

The meter is powered by the inner battery, and the back light is powered by the outside battery.

In this case, you could install it according to your demands.

With the new temperature sensor and the new program, the meter could reach up to 250°C, so it is good enough for you to install it on your bike to get the water temperature, oil temperature or the cylinder head temperature.

Get the new KOSO thermometer to monitor your engine, and enjoy the riding.

**CNC VOLT**

As you know the bike is quite heavy, so it is very important for you to monitor the situation of the battery all the time to avoid that you need to push your bike on the road.

The new LED volt meter we designed comes with the CNC machining case could fit your bike well and offer you the real time information about your battery.

With the warning light design, you could easily know that the battery is in good or bad condition and react on time.

Race 2013

## MINI 3

The new Mini3 meter comes with the new shape design makes the meter look more stylish. Except the shape design, the new meter comes with a wider LCD display to show the information properly.

## DUAL TEMPERATURE

The Mini3 meter comes with 2 temperature function, so you could install the sensors at the place you want to check and get the temperature information easily.

For example, you could install one sensor at the entrance and exit of the cooling system, and then you could know if the cooling system work properly.

The dual temperature meter is the best tool for you to check the temperature.

## Race

### Mini style

#### OIL PRESSURE

The oil pressure meter is designed for you to monitor the oil quality and situation. When you changed the oil, the oil pressure should be higher. When the oil pressure is lower, it means that the oil quality is going down. In this case, the oil pressure meter could help you understand the timing to change the oil.

If you ride the bike in high RPM range, the oil pressure meter could help you understand if the oil did lubricate the engine properly. If the oil pressure doesn't go higher when the engine RPM goes higher, then you need to check if you need to change the oil to protect your engine.

#### AMP & VOLT

The AMP & Volt meter is the best tool made for you to monitor the battery. When the battery is in good condition, the volt meter value will always higher than 12V, so when the volt is lower than 12V, it means that you need to check your battery. On the other side, if the volt is too higher, it means that something wrong with your regulator.

As for the amp meter, this function could help you to understand if the batter is charged properly. If the amp meter become minus or the amp value is too big, it means something wrong with the generator or your electrical system.

If you could use the amp with the volt information then you could find out when you have the problem with the battery or charging system on your bike.

#### ENGINE HOUR

How do you know the time to replace the parts or change the oil for your dirt bike or sport ATV when they come without the speedometer?

Most of the people do it by feeling or experience before, but now you don't need to guess any more.

KOSO provide you the new tool for doing this job for you, so you don't need to keep it on your mind all the time. All you need to do is to check the hour meter.

## Super slim style

**THERMOMETER**

**Option accessory**

## Super slim style

**VOLT**

The new super slim volt meter comes with the low voltage warning, so it will warn you when the battery is wrong. The digital display is more precise than the traditional meter, and it will be easier for you to notice the problem of the battery in the very beginning.

## Mini style

**LAP TIMER**

The lap timer is the newest product of Koso race line product. The lap timer could work on both the external button & the IR system, so you could use the meter to test even in the race track without IR system. The infrared beacon & IR transmitter is sold as a optional parts, so you could purchase it if the parts are needed.

The lap timer is developed to work with the inner battery, so you could use the meter even on the bike without battery. The white back light will be effective when you connect the external power, so even when you use the meter on the race in the night, you could also see the meter very clearly.

- Max recording time Display range: 9:59'59"
- Max. lap Display range: 200 Laps
- Max single lap time Display range: 99'59"99
- Lap time displayed Setting range: 1~30 seconds.
- Best lap Display range: 200 Laps
- IR Channel Setting range: 0~9
- Battery level Display range: 4 segment bar graph CR 2032
- Effective temperature range -10~+60°C
- Meter standard JIS D 0203 S2
- Meter size (W X L X H) 87.2 X 43.6X 20.3 mm
- Meter weight Around 82 g
- Telltales
  - Best lap checking light (Blue)
  - Signal checking light (Red)

### HD-01S

To make a stylish meter for Harley is always our dream, and finally we did it this time.

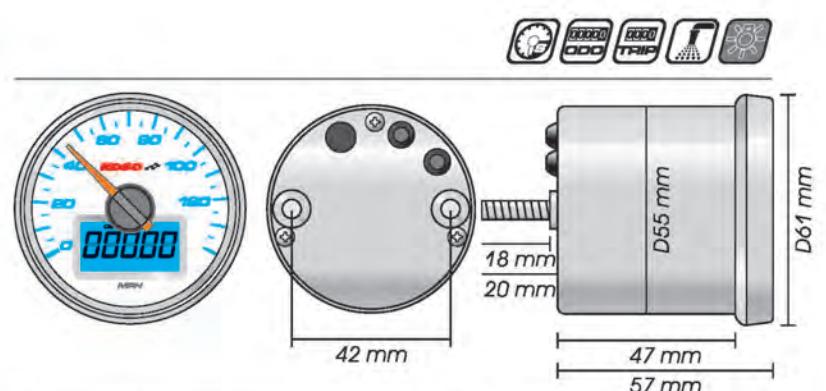

The KOSO HD-01 speedometer is compatible with the original speed sensor.

All you need it to ride 1 mile or kilometer to get the correct setting for the speedometer, and then you could start to enjoy your riding.

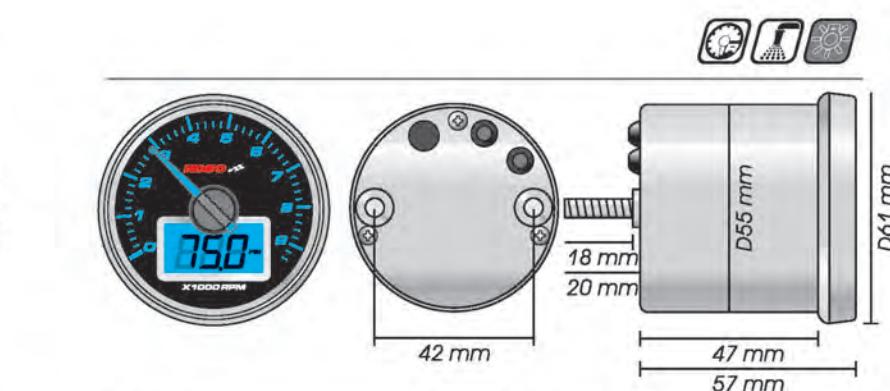

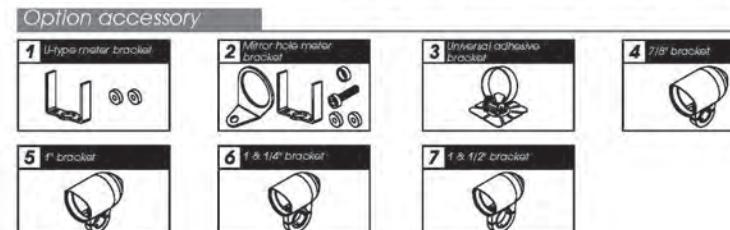

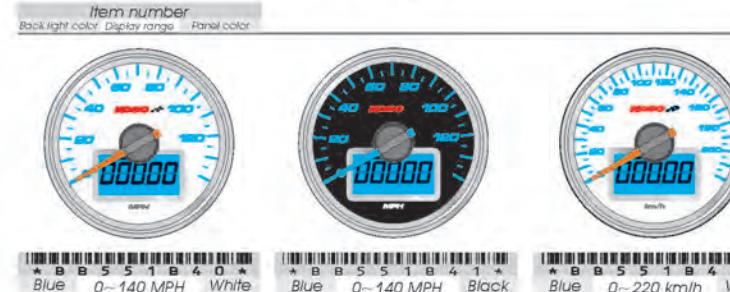

With the chrome bullet case, the meter could fit almost all the Harley easily.

We also develop different handle bar kit for you to install the meter on your own handle bar.

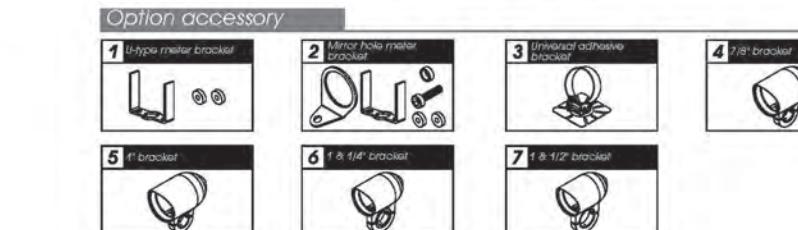

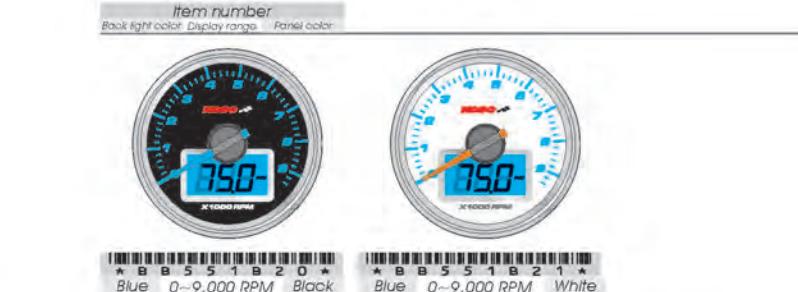

Get the KOSO HD-01 meter and make your Harley more unique.

● Speedometer	Display range: 0~220 km/h (0~140 MPH) Display unit: MPH <0.5 second
○ Display internal	
○ Odometer	Display range: 0~99999 km (mile), reset automatically after 99999 km (mile) Display unit: 1 km (mile)
○ Trip meter	Display range: 0~999.9 km (mile), reset automatically after 999.9 km (mile) Display unit: 0.1 km (mile)
● Supply voltage	DC 12V
● Effective temperature range	-10~+60°C
● Meter standard	JIS D 0203
● Meter size (D X H)	D55 X 57 mm
● Meter weight	Around 190 g

● Tachometer	Display range: 0~9,000 RPM Display unit: 100 RPM <0.5 second
○ Display internal	
○ Stroke / piston setting	2 Stroke: 1, 2, 3, 4 pistons 4 Stroke: 1, 2, 3, 4, 5, 6, 8, 10, 12 pistons
● Oil press	Display range: 0~75 psi Display unit: 0.1 psi <0.5 second
○ Display internal	
● Supply voltage	DC 12V
● Effective temperature range	-10~+60°C
● Meter standard	JIS D 0203
● Meter size (D X H)	D55 X 57 mm
● Meter weight	Around 190 g

## GP style

### HD-01R

To make a stylish meter for Harley is always our dream, and finally we did it this time.

The KOSO HD-01 tachometer is designed especially for the Harley with the oil pressure meter compatible with the original oil pressure sensor.

We also add the warning function for the oil pressure, so it will warn you when the oil pressure is too high.

With the chrome bullet case, the meter could fit almost all the Harley easily.

We also develop different handle bar kit for you to install the meter on your own handle bar. Get the KOSO HD-01 meter and make your Harley more unique.

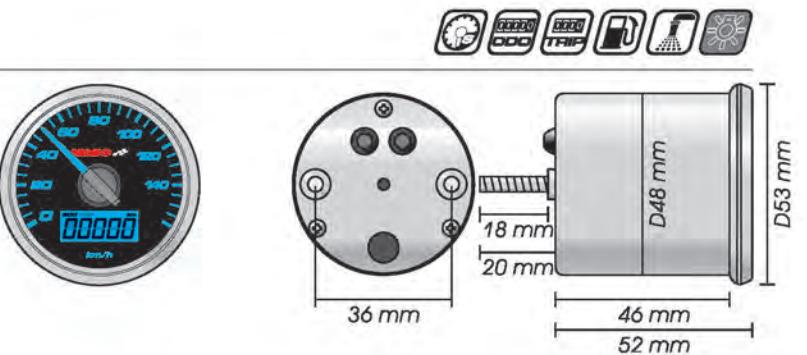

**D48 SPEEDOMETER**

For fitting the demand for the super small speedometer, it takes us almost one year to finish the super tiny electronic speedometer.

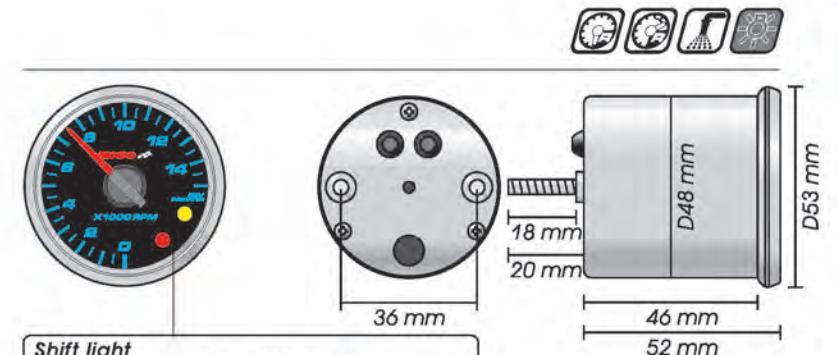

Instead of using the traditional mechanic movement, KOSO try to combine the high tech stepper motor with the LCD into the tiny speedometer.

With the stepper motor and LCD, the new speedometer comes with the luminous needle and back light powered by the super bright LED will work much better on your bike.

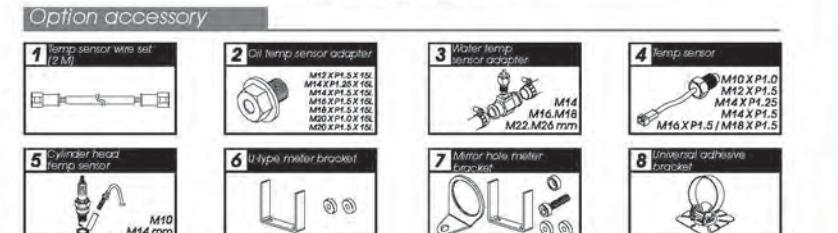

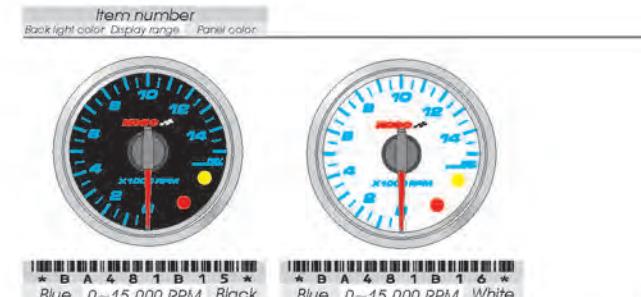

Are you still looking for the tiny speedometer for your beautiful bike? Here it is!

- Speedometer Display range: 0~160 km/h  
Display unit: 1 km/h  
<0.5 second
- Display internal
- Odometer Display range: 0~99999 km,  
reset automatically after 99999 km

- Meter size (D X H) D48 X 52 mm
- Meter weight Around 117 g

**D48 TACHOMETER**

To make the needle stable for the high vibration situation, we adopt the stepper motor on all of our needle meter series.

With the auto-scan function, the meter will scan when you turn on your machine.

The 15,000 RPM tachometer with illuminated needle and dial is much easily for you to read in night.

Two colors for you to choose black look or the simple white meter face design with the red needle.

For fitting different models, we also provide you the set table tachometer with a shift light for another choice.

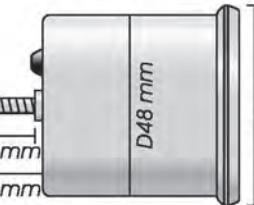

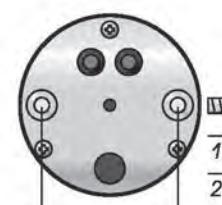

**D48 TACHOMETER**

The new GP II tachometer comes with the new stepper motor that upgrades the response speed of the needle & the stability to a new standard. The biggest improvement of the new tachometer is the response speed, the needle will move as fast as your throttle. With the new shift light design, the warning light will be easy to see under the sun.

NEW!

To make the needle stable for the high vibration situation, we adopt the stepper motor on all of our needle meter series.

With the auto-scan function, the meter will scan when you turn on your machine.

The thermometer could reach 150°C, so it is enough for you to use it for checking the water temperature or the oil temperature on your machine.

We have two colors for you to choose black carbon look or the simple white meter face design.

We also provide the thermometer with the set table heat warning light as a option.

### Black LCD

#### DL-01R D48 TACHOMETER

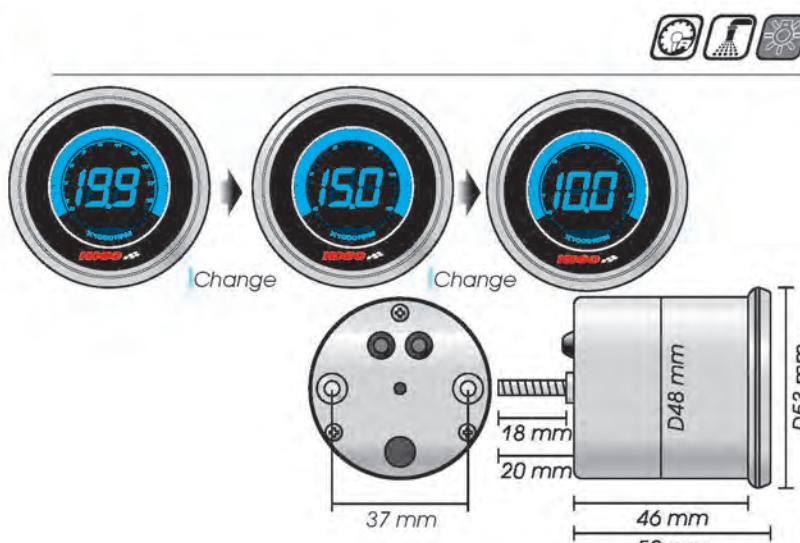

The all new 48 mm LCD tachometer is the new design we develop after 2 years research to solve the defect of LCD no moving feeling like the needle meter.

With the moving bar and the big digit tachometer, you could get the same moving feeling as the needle and very accurate RPM information at the same time.

With the MAX record function, you could check the engine situation all the time.

Except that, we add a new function the traditional needle meter can't reach the changeable scale.

The new LCD tachometer is that the RPM bar scale could be changed from 10,000 / 15,000 / 20,000 RPM to fit the engine on your bike, and make the bar tachometer works better on your bike.

- Tachometer
  - Display range: 0~10,000 / 15,000 / 19,900 RPM
  - Display unit: 10 RPM
  - <0.5 second
- MAX RPM record
- Stroke / piston setting
  - 2 Stroke: 1, 2, 3, 4 pistons
  - 4 Stroke: 1, 2, 3, 4, 5, 6, 8, 10, 12 pistons
- Supply voltage
  - Effective temperature range -10~+60°C
  - Meter standard JIS D 0203
  - Meter size (D X H) D48 X 52 mm
  - Meter weight Around 117 g

### Black LCD

#### D48 VOLT METER

The newly design black LCD style volt meter comes with the settable warning function, so you could adjust the warning according to your demand.

The new design bar graphic scale & digital volt meter is very easy for you to monitor the battery situation all the time.

#### D48 FUEL METER

The newly design black LCD style meter is designed to match to the street style meter which doesn't come with the fuel meter.

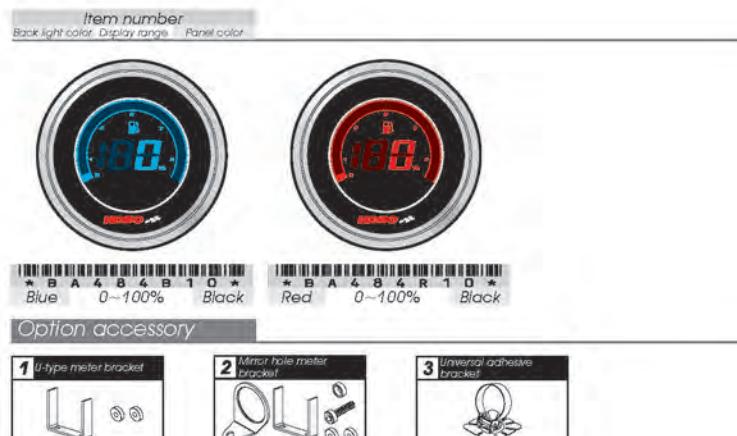

The fuel meter is adjustable for both 100 ohm & 510 ohm fuel sensor system.

Besides that, the new fuel meter comes with the fuel insufficient warning function.

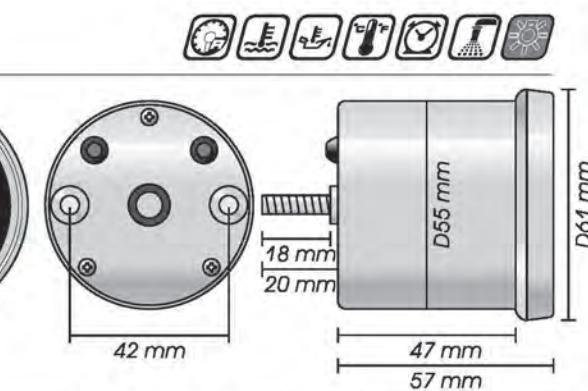

You could make the warning setting according to your demand.

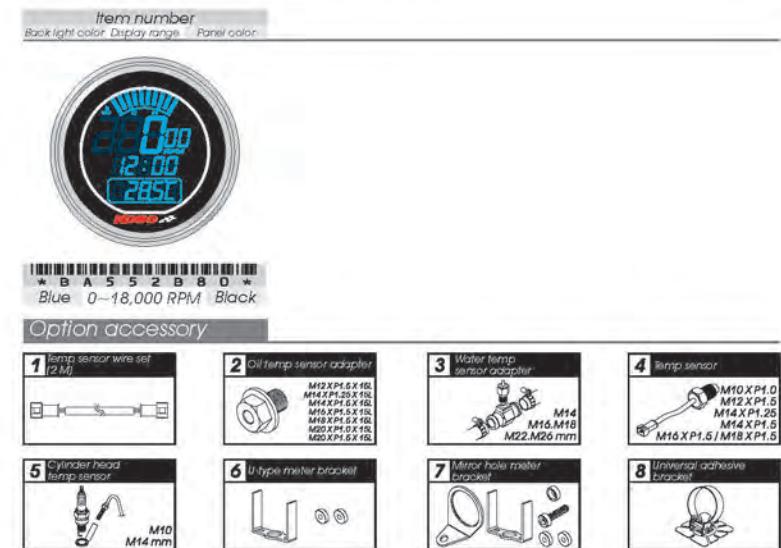

● Fuel meter	Display range: 0~100% Display unit : 1%
○ Bar graph fuel meter	Display range: 0~100% Display unit: Around 3.3%
○ Fuel level warning	Setting range: 0~25% Setting unit: 1%
● Fuel resistance	Setting range: 10(100 Ω), 51(510 Ω) US(Customize )
● Effective voltage	DC 12V
● Effective temperature range	-10~+60°C
● Meter standard	JIS D 0203 S2
● Meter size	D48 X 52.8 mm
● Meter weight	Around 117 g

● Tachometer	Display range: 0~18,000 RPM Display unit: 100 RPM
○ Display internal	<0.5 second
○ Stroke / piston setting	2 Stroke: 1, 2, 3, 4 pistons 4 Stroke: 1, 2, 3, 4, 5, 6, 8, 10, 12 pistons
● Thermometer	Display unit: °C & °F for alternative
● Digital thermometer	Display range: 0~120°C (32~248°F) Display unit: 0.1°C(F)
● Thermometer level	Display range: 20~120°C (68~248°F), 10 segment bar graph Display unit: 10°C (50°F) for each segment
○ Display internal	<0.5 second
● Clock	24 H
● Supply voltage	DC 12V
● Effective temperature range	-10~+60°C
● Meter standard	JIS D 0203
● Meter size (D X H)	D55 X 57 mm
● Meter weight	Around 190 g

### Black LCD

#### DL-01R D55 TACHOMETER

To update the LCD series product, we adopt the new LCD display method to make the letter more clearly under sun.

The blue light letter in the black display looks very fashion & unique, and it is very easy to know the accurate information from the LCD comparing to the needle type meter.

The flexibility is the most important function LCD could work, so all the unit displayed could be switch between the imperial and metric system you could put the black LCD style?

LCD speedometer and tachometer together to get all the information you need.

Looking for unique product to fit your unique bike.  
Try the new KOSO black LCD meter and enjoy your riding.

## Black LCD

**DL-02R  
D55 TACHOMETER**

On the tachometer, you could adjust the scale between 10,000 RPM, 15,000 RPM and 20,000 RPM.

The most different part on the new tachometer is that we will offer you 2 tachometers which work on the different direction.

One will move from right to left and another is moving from left to right.

The reason we make this design is that we hope that when you install the DL02 speedometer and tachometer together, you could tell the difference from speedometer and tachometer by the different direction they move.

This is a very confident design, and we hope this design could change something on the motorcycle world.

Street 2013

## DL-02S D55 SPEEDOMETER

The DL-02 is the new style LCD meter KOSO will introduce in the end of 2008. With the new meter construction, we could make the button on the meter panel.

It will be more convenient for you to use the meter daily. On the LCD, we use the bar to simulate the moving needle to make the LCD meter looks sport.

On the speedometer, the scale will adjust to MPH when you adjust the speed unit from Km/h to MPH.

On this new speedometer, we also design the average speed, so you could know more information when you go for trip with your bike.

-------------------	-------------

**DL-03SR SPEEDOMETER**

**GP style**

**E-mark E-approval**

**D64 DL-03SR**

The DL-03SR is the first round meter we add the RPM function into the speedometer. With the auto-switch function, the meter will adjust to the RPM display when you start the engine. When the engine is off, the meter will switch to the main screen and show you the information about the voltage and fuel automatically.

The white backlight design is easier to see the information display in the night. The most special function is the remaining mileage function we include in the meter, so you could use the learning model to make the meter learn the fuel consumption of your bike and then the meter will show you the remaining distance information.

## Tachometer installation instruction

### RPM sensor

#### INSTRUCTIONS

To improve the possibility to use the tachometer on different machines, we provide you 3 different ways to install the rpm sensor wiring, (only available on RX1N, RS DYNOMETER dyno edition, and GP style universal tachometer 48mm & 55mm now.)

You could choose to wrap the wiring on the spark plug wire, connect to the ignition coil positive wire, or the pick up.

We know this may still not enough to fit every different model on the world, but we are doing our best to make it possible. the new KOSO GP style universal tachometer could fit most of the scooter and ATV with CDI ignition system on the market, there are different ignition systems exist on the market, and we will keep developing the new product for it.

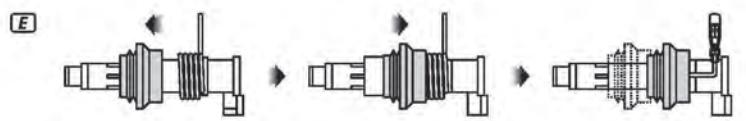

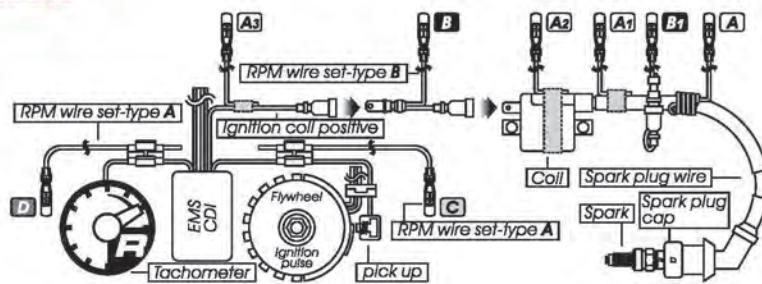

as for our old product, we will adopt the new technology when upgrading them.

#### SCOOTER

Manufacturer	Model	A	B	C	Setting
YAMAHA	JOG 50	O	Orange	White/Red	2C-1P
	JOG 90	O	Orange	White/Blue	2C-1P
	JOG 100	X	X	White/Blue	2C-1P
	RS 100	O	X	White/Blue	2C-1P
	MAJESTY 125	O	Orange	White/Blue	2C-1P
	SV MAX 125	O	X	X	2C-1P
	CYGNUS 125	X	X	White/Green	2C-1P
	GTR 125	O	X	White/Blue	2C-1P
	AEROX 50	O	X	White/Blue	2C-1P
YAMAHA/MBK	SLIDER 50	O	-	X	2C-1P
	CHO NORI	O	White/Blue	White/Red	2C-1P
GILERA	RUNNER 50	O	X	O	2C-1P
PEUGEOT	X-FIGHT 50	X	Yellow/Blue	Blue/Yellow	2C-1P

- A TYPE** Wrap the rpm wire onto the ignition cable wire.  
**B TYPE** Connect the rpm wire to the coil positive wire.  
**C TYPE** Connect the rpm wire to the pick up.

New tachometer test result:  
ATV

Manufacturer	Model	A	B	C	Setting
Manufacturer	Predator 500	O	O	O	2C-1P
	Sportsman 600	X	O	X	2C-1P
	Sportsman 700	X	O	X	2C-1P
HONDA	TRX 400 EX	O	O	O	2C-1P
	TRX 450 R	O	O	O	2C-1P

	RAPTOR	O	O	X	2C-1P
	LTZ 400	O	O	X	2C-1P
BOMBARDIER	DS 650	O	O	X	2C-1P

Main switch wiring reference:

	Power	Key on	Ground
YAMAHA	Red	Brown	Black
HONDA	Red	Red/Black	Green
SUZUKI	Red	Black	Green
KAWASAKI	White	Brown	Black/Yellow
KYMCO	Red	Black	Green
SYM	Red	Black	Green
PGO	Red/White	Orange	Black

**NOTE** The color listed above may differ depending on the model.

RPM wiring reference:

YAMAHA	Yellow/Black	BUELL	Ground
HONDA	Yellow/Green	CAGIVA	Gray/Green
SUZUKI	Yellow / Blue	DUCATI	Gray/Green
KAWASAKI	Light Blue	H-D	Pink
APRILIA	Gray / Violet	MV	Gray/Yellow
BMW	Black	TRIUMPH	Red
BENELLI	Geay/Violet		

**NOTE** The color listed above may differ depending on the model.

Fuel indicator wiring reference:

YAMAHA	Green	KYMCO	Yellow/White
HONDA	Yellow/White	SYM	Yellow/White
SUZUKI	Yellow/White	PGO	Gray
KAWASAKI	Black/L Green		

**⚠** The fuel sensor is electronic type, please don't parallel connection with the original- otherwise the fuel gauge won't display.

The wrong installation of the fuel wiring may cause the meter break.

### RPM sensor

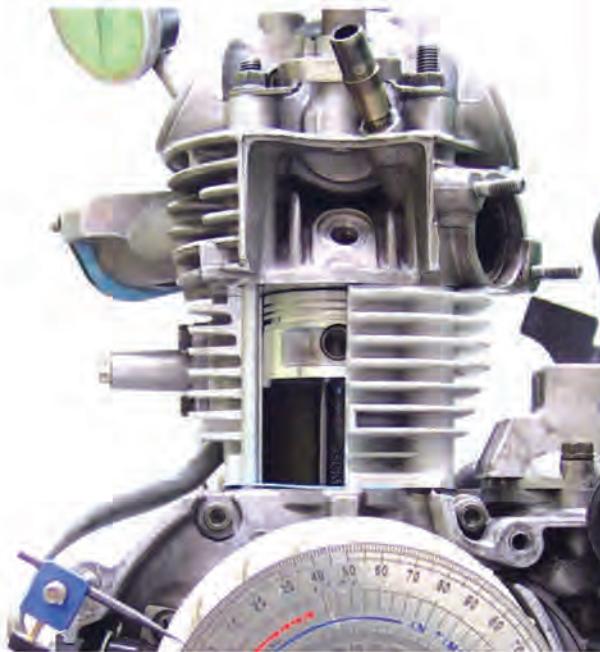

#### INSTRUCTIONS

For the models comes with the new ignition coil, please wrap the RPM wire at least 5 times around the spark plug as the above drawing.

For the model with the normal coil with spark plug wire, please wrap the sensor wire around 3~5 times on the spark plug wire to get the signal.

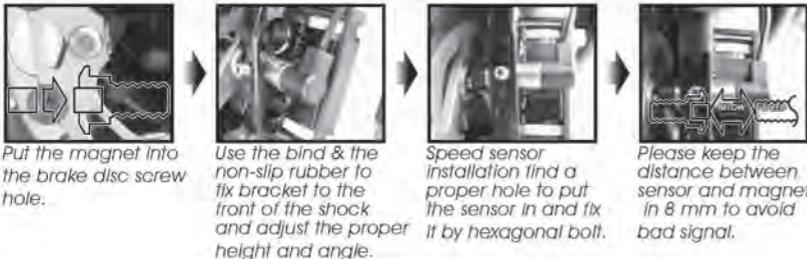

If you can't catch a good signal (Ex. the meter stopped counting the time after some times) from the spark plug wire, you could also try the 3 different methods showed to get a better signal, too.

For the model comes with the new ignition coil (the type without the spark plug wire), please follow the above 3 methods showed on drawing E to catch the signal.

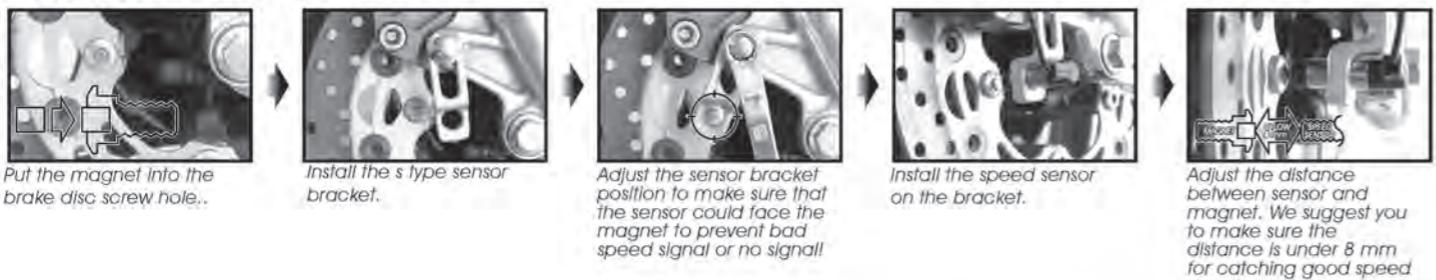

## SPEED SENSOR & ACCESSORY

### L type speed sensor bracket instruction

### S type speed sensor bracket instruction

### Passive speed sensor SH-01 [With water-proof connector]

### Passive speed sensor instruction

The more magnet sensor points are, the less the display interval is. When installing the magnet, please put the magnet with N-mark side

face the outside and put them averagely to avoid wrong signal.

EX. 1 If your disk has 3 screws, you could install 1 or 3 magnets to catch the speed.

EX. 2 If your disk has 4 screws, you could install 1~2 or 4 magnets to catch the speed.

EX. 3 If your disk has 5 screws, you could install 1 or 5 magnets to catch the speed.

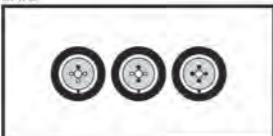

EX. 4 If your disk has 6 screws, you could install 1~2~3 or 6 magnets to catch the speed.

After finishing the magnet installation and sensor point setting, please move your tire to test the speedometer work or not.

EX.1

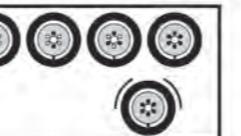

EX.2

EX.3

EX.4

### Passive speed sensor SH-01

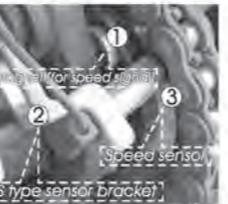

### S type speed sensor bracket instruction

1. Insert the signal magnet. (You need to dig a hole by yourself).
2. Install the s-type sensor bracket, you could adjust the proper distance and angle to fit different model.
3. After installing the sensor, please adjust the distance between sensor and magnet. Please keep the distance in 8 mm.

#### NOTE

About the setting, please refer to 4-7 tire circumference and sensor point setting.

### Active speed sensor SA-07 (With water-proof connector)

Length	Item number
900mm	* B F 6 4 0 J 0 0 *
1,150mm	* B F 6 4 0 J 0 1 *
1,350mm	* B F 6 4 0 J 0 2 *
1,550mm	* B F 6 4 0 J 0 4 *
1,750mm	* B F 6 4 0 J 0 5 *
2,000mm	* B F 6 4 0 J 0 6 *
4,000mm	* B F 6 4 0 J 0 7 *

### Active speed sensor SA-07

Length	Item number
900mm	* B F 6 4 0 0 0 0 *
1,150mm	* B F 6 4 0 0 0 1 *
1,350mm	* B F 6 4 0 0 0 2 *
1,550mm	* B F 6 4 0 0 0 4 *
1,750mm	* B F 6 4 0 0 0 5 *
2,000mm	* B F 6 4 0 0 0 6 *
4,000mm	* B F 6 4 0 0 0 7 *

### Active speed sensor instruction

The active speed sensor could be installed by the metal parts to detect the speed.

EX. 1 The disc screw.

EX. 2 The disc to detect the disc gap.

(Please make sure the distances between the gaps are the same in advance to avoid wrong speed signal.)

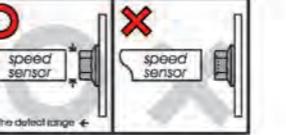

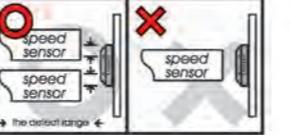

EX. 3 The sprocket to detect the disc gap.

(Please make sure the distances between the gaps are the same in advance to avoid wrong speed signal.)

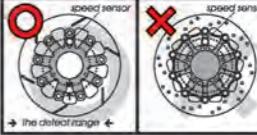

We will suggest you to catch the speed from the disc screws. The more the sensor points are, the better the speed accuracy is.

The maximum sensor points the speed sensor could detect is 60 points per turn.

## Heated Grip & Switch

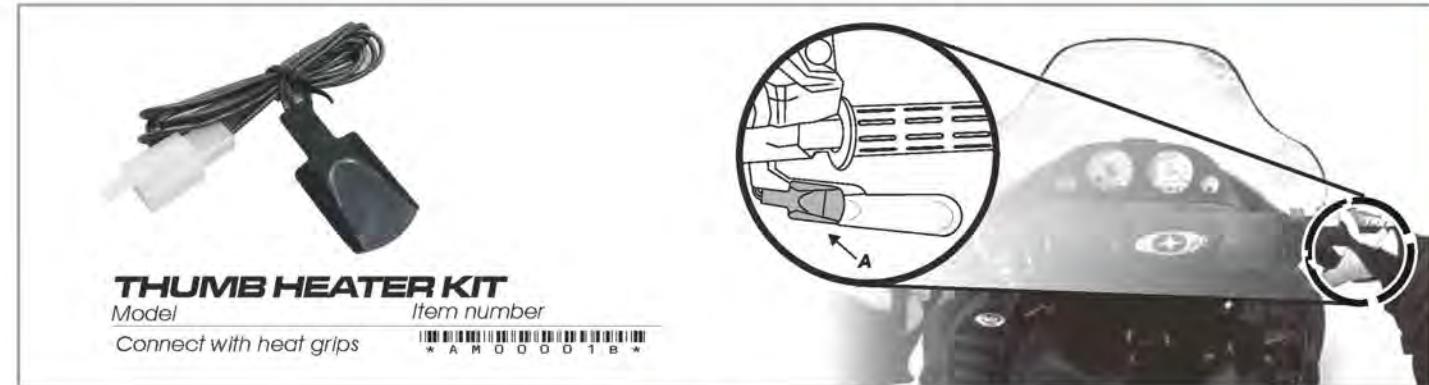

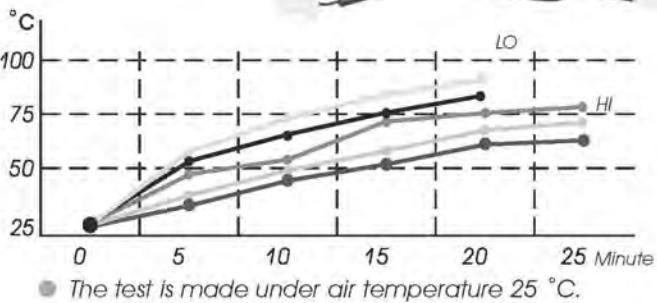

### HOT GRIP FEATURES

This new elegant grip design with revolutionary heating structure delivers heat faster than ever. The new 5 level temperature controller allows you to accurately adjust the grip temperature. You no longer need to tolerate the uncomfortable temperatures. No matter if you are looking for heated grips for your favorite scooter, motorcycle, ATV, snowmobile or Harley, we have what you need.

### Specification

- The elegant grip design makes the heat grip look nicer than other after market grips.
- The fast heating design delivers heat faster than traditional grips.
- The 5 level temperature controller adjusts the heat grip accurately to avoid uncomfortable temperatures.
- Special rubber material resists the outdoor environment.
- Even at high temperature, the grip remains resistant to damage.

## Heated Grip

### MULTI - ADJUSTMENT SWITCH FEATURES

Twisted switch could make the adjustment more accurate, pairing with LED level indicator to make the current set value more obvious. If any malfunction happen, the customers could quickly realize it and find out what is the problem according to the way that LED indicator flashing.

#### Specification

##### Low Voltage Warning

If the insufficient voltage for the battery (lower than 12V) happen when start the key-on and controller, the grip won't start heating to avoid the insufficient voltage for the engine start.

##### Short Circuit Protection

Unique short circuit protection setting. If the system detected the load of grip is shorted when start the key-on can controller, then the LED indicators will all flashing and cut the power supply automatically to protect the controller won't be damaged.

##### Component malfunction Warning

If internal component malfunction to cause the adjustment failure, then the LED indicators will flashing from side to side to inform the customer have to send the product for repairing.

### LED Indicator Warning Expression

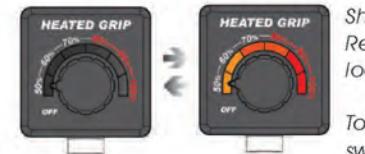

Flashing from Right to Left

Low Voltage Warning:  
Means the voltage is lower than 12V

To Deactivate:  
Please start the engine and wait until the voltage of the battery reach 13V

All Flashing

Short Circuit Protection Warning:  
Represent that system detect the load is shorted.

To Deactivate: Please twist the switch to OFF and double check the all wiring to see if there is any short circuit happened.

Flashing from Side to Side

Component Malfunction Warning:  
Represent the internal PCB components malfunction.

To Deactivate:  
Please turn off the power supply and remove the instrument.
