APOLLO heated grips

Our Apollo heated grips are designed with an integrated adjustable thumb switch, which allows them to easily fit on most motorcycles on the market. The integrated thumb switch gives the opportunity to the rider to adjust the temperature level without removing his hands from the handle bar for a safer ride.

Its wide temperature setting range will keep the rider comfortable under the cold riding conditions. The all-new 5 colors LED display will enhance the visual look of the heated grips and will allow the rider to quickly know in which heat level the grips are set.

Another great feature is the Low-voltage battery protection. This system will detect if the battery voltage is too low and will automatically turn off the heated grips in order to make sure the rider have enough power to start the engine.

ITEM NUMBER **AM111030**

For 7/8" + 1" handlebar with twist throttle

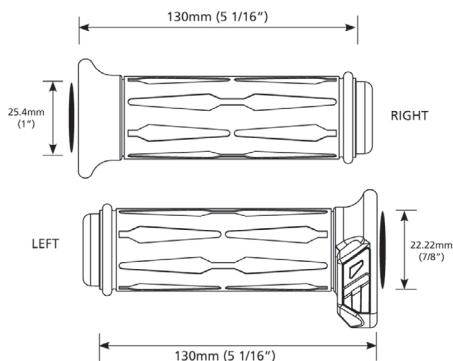

Parts included

Specifications

- Integrated thumb switch designed for easy installation and setting. Allow the user to change the setting without removing the hands from the handle bar for a safer ride.
- "Plug & Play" wiring connections to shorten the installation time.
- Wide temperature settings for cold weather conditions.
- Low Battery Warning protect to ensure the motorcycle have enough power to start.
- 5 Colors LED Indicators for the rider to quickly know in which heat level the grips are set.

MULTI ADJUSTMENT heated grips

Available for road and off-road applications, those multi adjustment heated-grips will keep your hands warm whatever the outside temperature ! The LED indicator with multi-levels will help you get the right heat adjustment ! In order to get enough power to start your engine, our new technology with "Low voltage warning" will automatically turn off the heated grips in case the voltage goes under 12V. Also, the "Short circuit protection" will help avoid damages to the control by cutting off power to the grips in case of short circuit.
